

## Unique Factors

1. On-Location Photography at no extra charge
2. Use of off-camera lighting provides soft light while making the main subject and surrounding colors pop
3. During the enhancement process, I specialize in making my clients skin appear full of life and vibrant; not overly red.
4. Finished photographs are only printed on Archival Fine Art Paper or Canvas.
5. Every photograph is delivered in museum quality conservation matting that will not warp or fade for the life of the print (up to 200 years).
6. I do design consultations (quick chats) before all of my portrait sessions. This allows me and the client to get comfortable with each other before we create the images. The design consultation is a critical step in capturing natural facial expressions and beautiful images.
7. I custom design all of my fine art albums. Covered with the clients choice of the finest leathers in the world, no two albums is the same.
8. All of my prints 16x20 and smaller are produced by hand in my home studio.
9. My clients are offered a superior level of customer service. Careful attention is taken to make sure that the shoot location, outfits, props and backdrops are exactly what the client is looking for.
10. I offer a 100% satisfaction guarantee. By chance, if a client did not love their images, I will do whatever is in my power to make them happy or gladly return their money with no hassles.
11. My clients have fun!
